

Asda Case Study

As our longest-standing client, our journey with ASDA began over 20 years ago, providing GNFR warehouse management services. Over the years our role within ASDA has grown, seeing us take responsibility for demand management, control, logistics management and installation of all store GNFR fixtures, as well as construction and mechanical & electrical works.

Overview

We manage demand for all GNFR equipment from multiple providers, planning requirements on a project-by-project basis.

Our expertise ensures that the right equipment is procured in the right volume, stored securely and despatched to site exactly when it is required.

Additionally, we appraise existing equipment and where viable, we refurbish units for re-deployment, subsequently avoiding any unnecessary spend.

Every year, we complete construction and contracting projects at over 130 individual sites, carefully managing each project from the architectural design stage, through to completion.

Our projects vary in size and scale from full store refurbishments to small scale remedial works, both internally and externally.

Client: Asda

Worked with since: 2007

Projects delivered: Asda receive the full one-stop-shop end-to-end service solution from Sigma including equipment consolidation, fit-out, installation and approved M&E contracting

Teams: Fixtures, Construction, Shop Fitting, M&E

Project location: Nationwide

Mechanical and Electrical Implementation

From energy efficient Building Management Systems to LED lighting upgrades, data, fire and security system infrastructure design and implementation, we complete and maintain over 100 stores every year.

Project Management and Implementation

Every year we deliver and install equipment in over 200 stores. Our experienced project managers and skilled installation team orchestrate the phased inbound delivery and installation of equipment of varying size, volume and complexity, from multiple providers.

How we added value

- ✓ Over 2,000,000 fixtures managed
- ✓ Over 76,000 pallets handled
- ✓ Over 33,000 individual deliveries
- ✓ Across estate of over 630 stores

"Sigma have worked on a number of Rollouts / Range change installations for myself and I have always found them to be effective, adaptable and thorough in their approach to projects. Their communication is timely, detailed and appropriate to the project. They have a wealth of experience within their company which allows them to proactively respond to the challenges that some rollouts may bring, and they are capable of offering solutions in an educated and considered manner."

Karen Leasley, Implementation Manager - Asda
