

# Lidl Case Study

Having taken control of Lidl's new site in Clifton as a "developer's shell", we managed all aspects of its subsequent transformation into a successful, trading store. Through careful and proactive project co-ordination alongside the site's developer, our team successfully managed to regain time lost to early development setbacks prior to our commencement on site, enabling Lidl to open the store for trade on time and on budget.

## Overview

Our role saw us manage multiple third parties and suppliers, implementing all construction aspects from wall linings, M&E and utility services to flooring, ceiling and decorating.

We subsequently orchestrated the implementation of all interior fixtures and equipment, both in the front and back of house, delivering both a quality trading environment for customers and working environment for staff.

"An excellent delivery of the scheme... finished to an exceptional standard"

**Adam Sadler, Senior Construction Consultant – Lidl**

**Client:** Lidl

**Worked with since:** 2018

**Projects delivered:** Multi-store expansion partner for all new build stores in the UK

**Teams:** Sigma Constructicon, Sigma M&E

**Project location:** Clifton, Notts

## How we added value

- ✓ **Full end-to-end project management:**  
Projects accepted and completed within tight deadlines
- ✓ **Applied knowledge and expertise:**  
Our highly knowledgeable team brought a wealth of experience gained from multiple other national and international retailers.
- ✓ **Highly developed, specialist supply chain:**  
Providing the right skill sets, with the right specialist knowledge for each individual stage of the build.
- ✓ **Premium time working:**  
Successfully regained time lost to late handover from developer.
- ✓ **Snag-free performance:**  
Our first project for Lidl, delivered ahead of time, on budget and snag free.
